Message from Rector & Correspondent

Dear Parents,

Cordial greetings. Happy to contact you through this DBXpressions.

The first term is almost over, and our students are into various learning processes. As always, the focus is on holistic education. The first term is filled with various activities and learnings. The classroom learning is happening through various methods: subject-based project development and presentation in classes and shared with other grades; outdoor demonstrations; activity-based learning; learning through subject based quizzes and competitions; participation in inter-school level competitions; seminars and sessions by students on various subjects and many more. Parallelly, they are involved in sports coaching, cultural and talent development activities, club activities and participation in CBSE Inter-School Sahadoya competitions. All these educational programmes aim to empower the young minds healthily and holistically.

Another important dimension for any educational institution is building the capacity of the teachers, to meet today's students. The school updates and organizes training programmes for staff on various fields: Don Bosco Educational System, CBSE Curriculum Related Trainings, Understanding Psychologically Different Age-group of students, Traits of Effective Teachers, Child Safety and Creating Emotionally Safe Space for Children, Every Student is a Leader and Creating Leaders in the Class; Effective use of digital tools and innovative methods of teaching and many more.

Our aim is not to fill the term with activities but providing integrated learning through these activities, so that their young minds are empowered and strengthened.

Thank you,

Fr. Ricopar Royan
Rector and Correspondent.

Message from the Principal's Desk

We are at the fag end of our first term. Lots of learning has taken place these days. Seminars were conducted for students and teachers, sports day was organized for the students to showcase their talents in sports and games. Students were given a chance to participate in numerous competitions and programmes. To top it all a few students won in the interschool and national level competitions too and brought laurels to our school. Several CCA, Extra Curricular activities were organized to help the children to learn something new. Appropriate classroom activities were conducted by our highly competent teachers to impart knowledge and to engage all the students in the learning process. Exams were conducted to test their knowledge and to identify the learning gaps. As a principal, I sit back, reflect and thank God for such a adorable children and talented teachers that we have in DBX. They all think quick, study smart and dream big.

We are aware that the children are the future of our society hence they all need our accompaniment, periodical pat on the back and unfailing friendly support. Given the stress level of our children, walking an extra mile is absolutely essential for the healthy growth of our children. And most importantly listening to their views and perspectives.

We as elders in the family, need to teach them to live the life joyfully as we are going to be here in this earth only once. So let's make this earth a heaven and make the life of our kids more meaningful without giving importance to disparities in the society. As Jess Lair used to say "Children are not things to be molded, but are people to be unfolded." Let's unfold their dreams, views and thinking.

Fr. Martin
The principal.

2-6-23 TO 10-6-23
